

Amendments to the Specification:

Please replace the paragraph beginning at page 16, line 1 with the following amended paragraph:

Lower bumper portion 2170 includes a tissue contacting surface 2122a and an L-shaped recess 2172 for receiving an L-shaped electrode 2130, as discussed above. L-shaped electrode 2130 includes an electrically conductive surface 2135 that is flush with tissue contacting surface 2122a. Alternatively, an electrically conductive surface 2135a can extend projects from tissue contacting surface 2122a or an electrically conductive surface 2135b is [[be]] recessed in tissue contacting surface 2122a. Electrically conductive surface 2135 has a surface area substantially smaller than tissue contacting surface 2122a.
